CE

WHO ARE WE?

Welcome to the world of portable pools designed by Caretta Pools.

We're excited to introduce you to a brand-new level of luxury, combining the functionality of portable pools with the allure of a private swimming oasis.

OUR VALUES

Explore the future of swimming pools with Caretta Pools!

We believe your personal pool dream should be convenient and eco-friendly.

MODULAR DESIGN

Our designer pools are incredibly versatile with widths ranging from 2.15 to 3.5 meters and lengths from 3 to 12 meters, ensuring they fit perfectly into your space, whether it's a compact backyard or an expansive rooftop.

EFFORTLESS INSTALLATION

Installing your pool is effortless and easy because no construction or foundation work is required. We've eliminated the complexities associated with traditional pool construction.

UNIQUE FEATURE PACKAGES

We offer a wide variety of finishing packages, allowing you to choose the aesthetic that best suits your style and surroundings.

WHY CHOOSE US?

We are here to redefine your free time and bring innovative design to your doorstep.

15+
YEARS OF
EXPERIENCE

**SIMPLE
POWERFUL AND
SUSTAINABLE!**

Join us to create a world where luxury and sustainability blend seamlessly!

CUSTOMIZATION

Your pool should reflect your personality. You can choose from a wide range of colors and design options to make your pool a unique masterpiece.

MOBILITY

Our pools are designed with mobility in mind. If you ever move, you can take your pool with you and continue to enjoy the luxury it provides.

AFTER-SALES SUPPORT

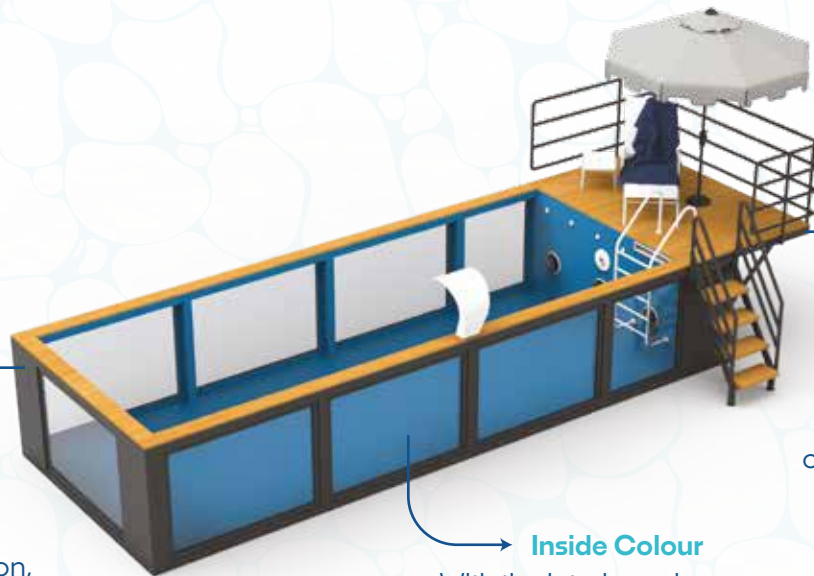

We offer dedicated support and comprehensive after-sales services to ensure your pool remains a source of enjoyment for years to come.

Innovative Caretta Pools – Dive into Luxury!

Are you ready to transform your space with a state-of-the-art Caretta pool? Create your own Caretta and dive into a world of luxury, style, and sustainability.

Create
Your Own
Pool!

Outside Colour

With the exterior color customization option, you can choose the color that best suits you and your space.

Inside Colour

With the interior color customization option, you can make the inside of your pool in different shades of blue.

Corner Profiles

With the corner profile color option, you can customize the exterior of your pool to match your garden or home.

PRODUCTS SMALL PACKAGES

Imagine yourself poolside, enjoying the sun and the tranquility of your own swimming pool.

With Caretta Pools, this dream is now a reality. Explore our different packages and find the best option.

ANTALYA

2,30x4,00

Colour Options;

Inside

RAL 5015

RAL 5010

RAL 5024

Outside

W203 - Dark Walnut

W206 - Light Oak

60-B906-0516 Shiny Silver

Corners

S51 - Battleship Gray

G203 - Metallic Red

G14 - Burnt Orange

Options;

☞ Waterfall Options

AISI 316

AISI 316

☞ Disinfection Systems

- 1 pH regulator 5 l/h 2 bar
- 1 Rx regulator 10 l/h 2 bar
- 1 pre-filter
- 1 transparent electrode holder housing
- 1 pH electrode, 1 Rx electrode
- Adjustment solutions included
- Panel-mounted system (plug & play)

☞ Salt Electrolysis Systems

- Enjoy more, maintain less:
- E-Next will take it on itself to give you more time to enjoy your pool
- Reduced footprint: E-Next can fit in more installations
- Safety first: Security features such as gas sensor

☞ Del Ozone System Ozone Generator

- Eliminates 99.9% of harmful contaminants
- Rapidly oxidizes Cryptosporidium, Giardia, and other chlorine-resistant microorganisms
- Significantly reduces chemical demand and increases the effectiveness of disinfectants
- Breaks down combined chlorine (chloramines), making chlorine more effective and the water more comfortable
- While ozone does so much, it provides up to 90% savings on chlorine

Options;

☞ Heat Pump Systems

The TommaTech pool heat pump with a DC Twin Rotary Inverter compressor starts at 20% capacity and adjusts capacity up to 100% based on the water temperature. This design requires three times less starting current compared to traditional ON/OFF heat pumps, enabling more efficient use and lower energy consumption while protecting the household electrical system. The DC inverter compressor is equipped with a special vibration-damping design and a sound-insulating cover, allowing it to operate at a very low noise level of only 32 dB(A). This ensures comfortable conditions in your pool without compromising acoustic comfort.

☞ Blue Lagoon Tech UV-C

Blue Lagoon Tech UV-C is a compact, powerful solution for high disinfection efficiency in limited spaces.

Eco-friendly and effective for pool water treatment, it offers easy installation and maintenance.

Built with 316L stainless steel housing, it includes Ø63mm–Ø50mm fittings and 1½" female threaded connections.

☞ Lighting

Dynamic RGB (Red-Green-Blue) lighting system with rich color options to add vibrancy to your pool.

All lighting management is at your fingertips. Turning the lights on/off and color tone adjustments are done easily and conveniently via a mobile application.

☞ Countercurrent Jet

A powerful counter current system that can be used with one or two pumps as a single or double jet. The face plate features an LED light and integrated controls for safe operation in the water. The adjustable nozzle allows you to change the water flow direction, while the valve lets you control the bubble effect.

Options;

☞ Top Cover Options

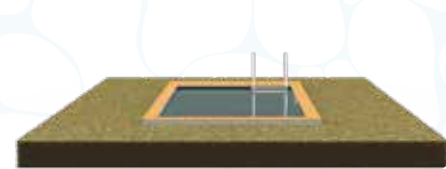

-The system provides maximum comfort and effortless operation with its fully automatic and remote-controlled working principle. You can easily open and close your pool with a single button.

-Thanks to the closed system, the heating and cooling time of the pool water is shortened, ensuring the target temperature is reached quickly with less energy consumption, and the temperature is maintained.

-With optional solar energy panels that can be added, the system can self-generate its own energy requirements.

-The solar energy system can be upgraded to support your home's general energy consumption, not just the pool system.
